with "Expert Installation" when you buy an eligible water-efficient toilet and have it installed through The Home Depot.

### Why a water-efficient toilet?

A regular toilet can waste the most water in your home – using more than is required. On the other hand, a water-efficient toilet uses less than 1/2 the water and saves you money on your water bills. A water-efficient toilet helps to reduce water use across the City of Toronto, ensuring that the water system can meet the needs of our growing city.

Customers choosing to install their own toilets are eligible for a \$60 mail-in rebate. See the City of Toronto's 'Flush with savings' brochure for full details or call 416-392-7000.

#### Eligible toilets:

**Sanitary**  
Model #12211-01  
Model #12211-02  
Model #12211-03  
Model #12211-04

**Super**  
Model #12211-05  
Model #12211-06  
Model #12211-07

**Compact**  
Model #12211-08  
Model #12211-09  
Model #12211-10  
Model #12211-11

**Mini**  
Model #12211-12  
Model #12211-13  
Model #12211-14
